Explore what is possible!
Learn something new!
Broaden your horizons!

TED Talks (technology - entertainment - design) started in 1984 covers almost all topics from science to global issues with more than 3000 talks.

Get inspired with ideas worth spreading!

Wednesdays, November 6, 13, 20 December 4, 11, 18
3:30 – 5:00 p.m. $50 Faculty: Debra McCormack

TED (Technology Entertainment Design) Talks have provided many amazing stories and ideas worth sharing. In this class, members choose TED Talk subjects for the class to view and then lead a discussion based on that topic. To start, the instructor and one other member will show a TED Talk and then lead the discussion. A schedule will be set up at that class for two or three students a week to give their presentations in the following five classes. Debra, as the facilitator, will have your talk ready to show to the class and can assist with the presentation if needed. For the first class: Go to ted.com/talks, select a topic that interests you, and forward the link to Debra’s email (2debmc@gmail.com).
